Work Experience

Suffix IT Limited   *Dhaka, Bangladesh*

SOFTWARE ENGINEER   *Dec. 2020 - Present*

- Developed classified Softwares like:Sales Force, ERP, SAAS Softwares, Inventory Management etc. with React JS For Suffix IT Ltd.
- Did front-end Design and implementation
- Used React hook form to control form data and use them
- Created Custom hooks for implementing features that is being used frequently
- Implemented authentication with the functionality of access token and refresh token
- Used blobs data and converted them to file for the users to download
- Tested REST endpoints using POSTMAN.
- Used redux to store data globally and for easy retrieval of data to any component in the app.
- Used React Refs, Controlled and Un Controlled react components for different use cases.
- Maximized use of Events and promises in ES6 and React for application control flow.
- Worked with AXIOS, promise based HTTP client for the browser and node.js for hitting REST endpoints and fetching data into the app.

Other Projects

PERSONAL PROJECTS

Hotel Booking: This is an MERN Based hotel booking Application. Raw Css was used to design the UI and for back-end logics Node, Express, MongoDB was used. The user can login, search hotels and view details and book rooms

 Hotel-Booking (Backend)   Hotel-Booking (Frontend)   Live

Talk-A-Tive: This is an MERN Based chatting application with realtime response. Chakra-Ui was used to design the frontend. And for realtime communication Socket.io was used. Anyone can register here and login to their own panel and the user can search users and text them and they can also create group chat.

 Talk-A-Tive (Frontend)   Live

Ramadan Timing: This is a React app which keeps countdown of both Iftar Sehri Timing for the Muslim. It also notifies with Adhan if time has passed. Anyone can view the schedules here.

 Ramadan Timing (Frontend)   Live

Architecture Landing Page: This is a Next.Js app and the css is done with Tailwind css. Basically a portfolio for a architecture related company.

 Architecture Landing   Live

Webcam with Custom Validation: This project was a test task for a private institute. The task was to take webcam permission and let the user to take picture. After taking picture user will be given a random generated captcha for validation. If the user fails multiple times he/she will be blocked

☐ Webcam with Custom Validation (Frontend)   ☐ Live

Image Search: One page web application. People can search anything they need. To get the photos needed, an API of a photo provider was integrated using React JS

☐ Image Search (Frontend)   ☐ Live
